## Best Practice

### 1) Plantation Programme

#### Objectives of the Practice

People have noticed that nature has been changing drastically, and we are to blame for this as we are creating and constructing an increasing number of towns and cities. Therefore, the combination of oxygen has been wrecked because nature has become uneven and disturbed. Thus, we must now sustain this equilibrium by adhering to the following guidelines:

- Plantation programme can become more popular. Therefore, it is our responsibility to encourage an increasing number of students to come forward.
- To enhance the values of plants & environment among the students.
- To ensure more plantation of useful plants, Medicinal Plant & trees.
- To enhance environmental sustainability and promote biodiversity on the campus.
- To create awareness among students, staff, and the community about the importance of tree plantation and its impact on climate change.
- To transform the campus into a green, eco-friendly space that promotes a healthy environment.
- Therefore, it is our responsibility to encourage an increasing number of students to come forward

**Dr. Manikrao Thitte**  
Principal

- To rising up the level of the student thinking regarding plantation work.
- To ensure the sincerity of the students regarding the values of trees & plants.
- To inculcate the programme of plantation can change the heart & hobbies of students
- To produce more and more oxygen.

## The Practice

Plantation of trees in a college campus plays a pivotal role in fostering environmental sustainability and creating a serene, eco-friendly atmosphere conducive to learning. By planting trees, the institution contributes significantly to combating climate change, enhancing biodiversity, and improving air quality. It is very important to plant more and more trees, herbs and climbers because these are the carriers of rain and cloud. Only the nature has capacity to turn up the balance of nature to produce more and more oxygen, but it is only possible when our surroundings are full of trees and plants. Such type of programme is only possible when our new generation become more & more sincere and active towards plantation programme. If our programme of plantation makes the points of success, it is sure and certain that our nature will be in balance and the life of the people can be happy & prosperous. So, we should plant more & more trees and protect them for the future of new generation.

## Best Practice

### 2) Cleanliness drive in college

#### Objectives of the Practice

A cleanliness drive in college is a vital initiative to instill a sense of responsibility and hygiene among students while fostering a clean and healthy campus environment. Such drives emphasize the importance of maintaining cleanliness not only on the college premises but also in surrounding areas, creating a ripple effect in the broader community. Our college runs activities such as waste segregation, proper disposal of garbage, and cleaning of classrooms, common areas, and gardens are carried out with active participation from students, faculty, and non-teaching staff. These efforts promote environmental awareness, reduce pollution, and encourage sustainable practices like recycling and composting. Cleanliness drives also align with national campaigns like Swachh Bharat Abhiyan, instilling civic pride and community spirit. Beyond the physical outcomes, these drives serve as an educational tool, cultivating lifelong habits of cleanliness and personal responsibility among students. A clean and well-maintained campus not only enhances its aesthetic appeal but also creates a positive and productive learning atmosphere.

- To arrange dustbin with Blue and Green-colour for Recycled and Unrecyclable waste respectively in view of making students aware about classification of wastes.
- All kinds of waste material like broken furniture, unusable equipment, defunct vehicles etc. should be completely removed from the premises of institutions.
